

DFWBGH Pulse Survey Innovations in Diabetes

February 2017

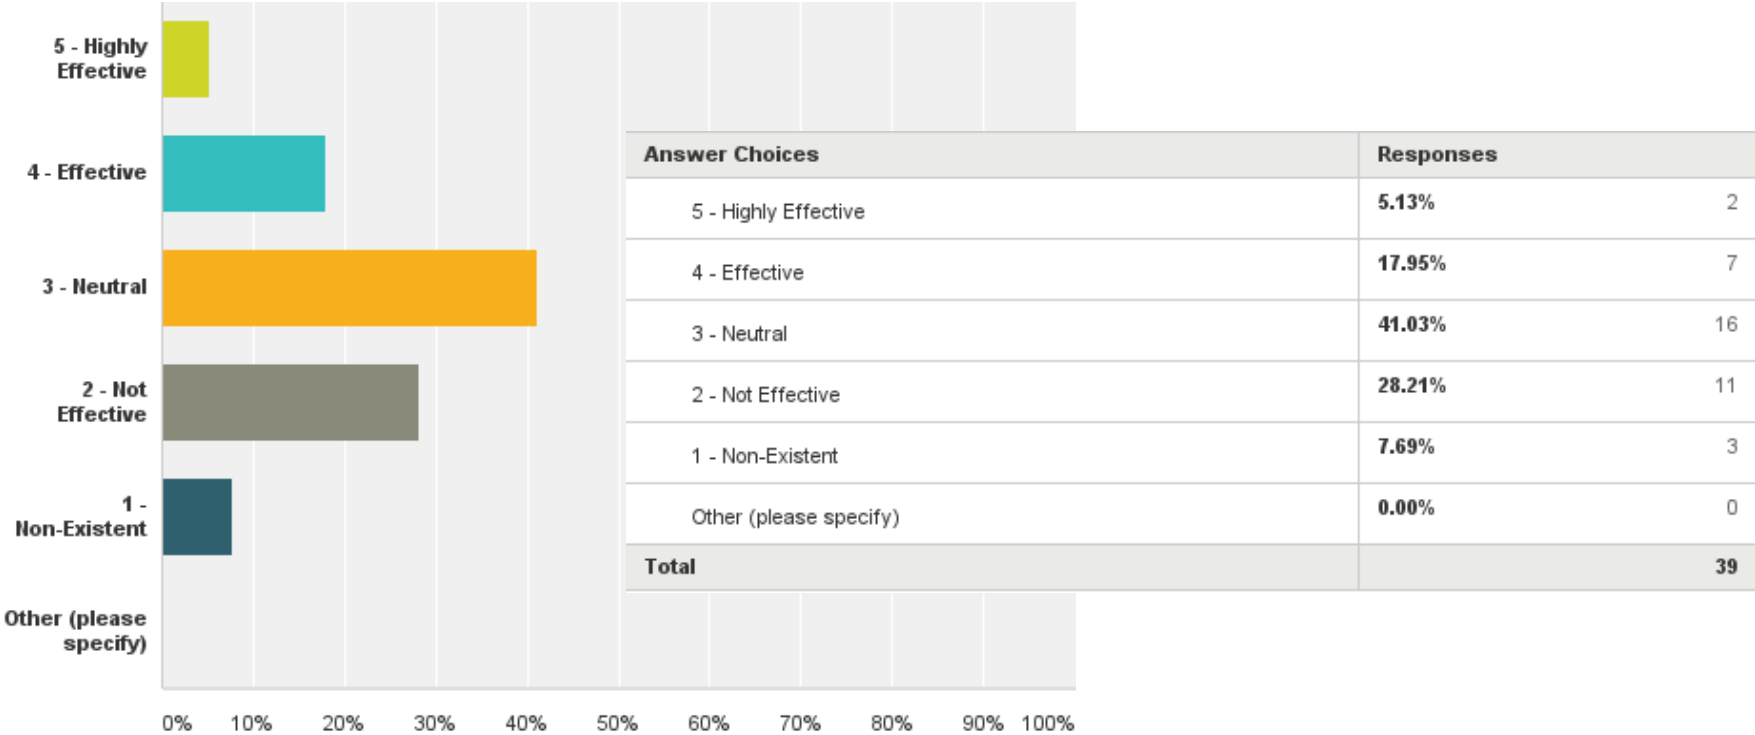

Would you agree or disagree with this statement? There are lots of new, interesting and effective engagement tools and resources being offered by Providers?

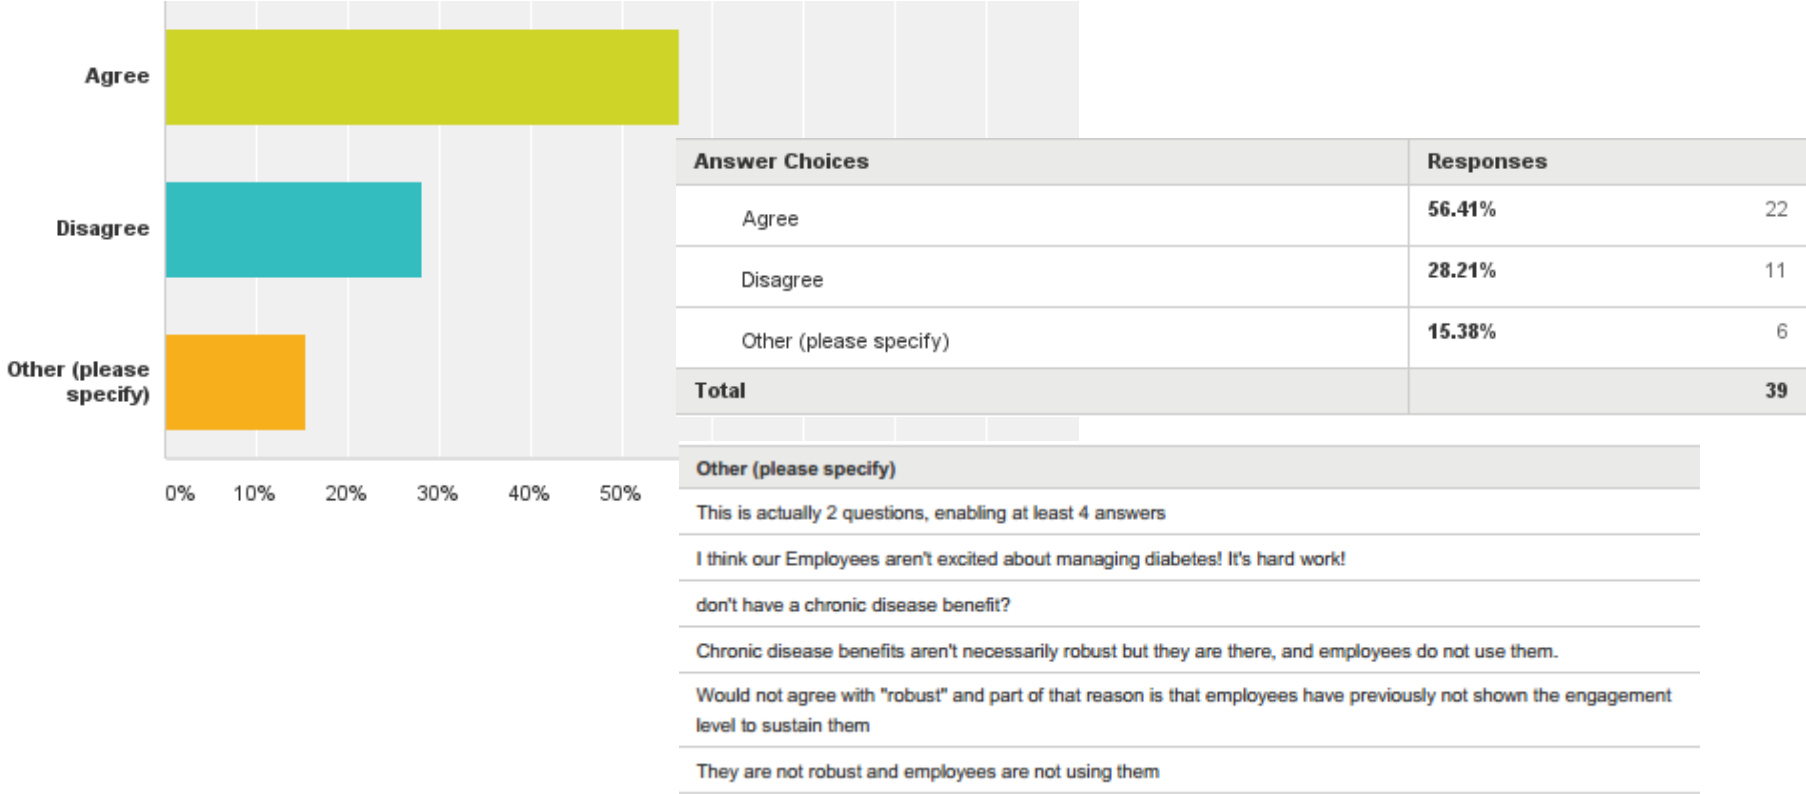

| Answer Choices | Responses |
|------------------------|-----------|
| Agree | 48.72% 19 |
| Disagree | 35.90% 14 |
| Other (please specify) | 15.38% 6 |
| Total | 39 |

| Other (please specify) |
|--|
| New - maybe, effective - questionable. Yes, we've heard about Livongo - question is are we paying significantly more for those who have already been doing all the right things (even after offsetting the cost of strips)? On the pre-diabetic management, the problem is getting those members to even go to a doctor to get the biometrics done, and then get them to want to engage. They aren't going to the doctor because they don't think they have a problem to begin with :/ |
| neutral |
| they are good for salaried employee population. not effective with hourly |
| Not sure if there is enough "proof" that they're effective |
| Not sure how much is new and interesting |
| Don't know |

On a scale of 1 – 5, I would rate my Employee Diabetes Efforts:

Would you agree or disagree with this statement: My chronic disease benefits are very robust but my employees aren't using them.

I would be interested in learning what is new and effective in the management of Diabetes

| Answer Choices | Responses |
